Listed below are all the adverts placed for Mitsubishi's within the modern car parts section on OCC, pulling together ads that have been placed on the existing specific Mitsubishi model pages. To view any of these ads in full, or add your own advert, simply visit the relevant model page. On there you'll find all the ads for that particular model in greater detail, and also details on how to ...

Mitsubishi cars. Parts and spares for old Mitsubishi's

Replacement intervals can vary, Mitsubishi recommends timing belt replacement on most of the models we cover every 60,000 miles. Consider the fact that if a related component such as the water pump, idler pulleys, hydraulic tensioner, cam seals or crankshaft seal fails it can ruin any timing belt – old or new.

Fuel injection is the introduction of fuel in an internal combustion engine, most commonly automotive engines, by the means of an injector.. All diesel engines use fuel injection by design. Petrol engines can use gasoline direct injection, where the fuel is directly delivered into the combustion chamber, or indirect injection where the fuel is mixed with air before the intake stroke.

An internal combustion engine (ICE) is a heat engine where the combustion of a fuel occurs with an oxidizer (usually air) in a combustion chamber that is an integral part of the working fluid flow circuit. In an internal combustion engine, the expansion of the high-temperature and high-pressure gases produced by combustion applies direct force to some component of the engine.

The most widely recognised problem with fixed geometry devices is turbocharger lag; the poor transient response of the turbocharger at low engine loads. Fig. 1 shows the major contributors to turbocharger lag for a SI engine. The biggest contributor is the rotating inertia of the turbine; this is due to the airflow not being sufficient to spool up the turbine rotor to higher speeds, a problem ...
