mpfi fuel injection system

ADVANTAGES OF MULTI POINT FUEL INJECTION SYSTEM. More uniform air-fuel mixture will be supplied to each cylinder, hence the difference in power developed in each cylinder is minimum. The vibrations produced in MPFI engines is very less, due to this life of the engine component is increased.

ECU ECU or the Electronic Control Unit is the brain behind the MPFI system. It is a computer chip which receives input on various engine parameters, compares them against preloaded engine and throttle maps and accordingly decides exactly how much fuel is to be injected into which cylinder and at what time

The harness will be marked as to which side of the engine the injectors are connected to. It does not make any difference which side they are hooked up to, but the harness may not reach properly if not hooked up to its design intent. FUEL PUMP An external fuel pump may have been included with your MPFI system.
