Rattling and tapping in the front of the engine on the 2003-2006 Nissan 350Z is very evident, especially on cold starts. This rattling noise should not be taken lightly as it warns of upcoming timing chain failure.. The cause of the noise is faulty timing chain guide rails and timing chain tensioners that wear out well ahead of schedule.

This video is an in-depth tutorial on how to properly diagnose and repair a failed timing chain tensioner on a Nissan VQ35DE. This engine is in a 2003 Nissan Altima.

### **Nissan VQ35DE timing chain diagnostic and repair**

A friend recently acquired a Nissan Sunny with the GA15 engine and needs to change the timing chains and guides, and the water pump. This is an unusual engine here as the model was not formally sold in this country - its a 'grey' import from Japan. The mechanic is unsure of how to determine or set the timing for the camshafts (valve timing).
