The motor control is based upon the motor speed feedback (sensored software). The speed transducer is an incremental encoder, with two phases shifted at 90°. The encoder can be of different types : - power supply: +12V - electric output: open collector (NPN or PNP), push-pull. COMBI AC1 could also be used without encoder, sensorless control.

User Manual

The Manual Servo Controller MX-04 is useful for aligning servos during construction of a robot or experimenting with motor drivers without needing to write a program. It allows you to operate your servo or like device quickly and easily.
