Noisy Engine After Oil Change

Engine noisy after oil change. This allows the engine to get quick oil flow when it is started cold verses dry running until lubricant either warms up sufficiently or is finally forced through the engine oil system. The advantages of a low W viscosity number is obvious. The quicker the oil flows cold, the less dry running.

Engine noisy after oil change - Page 1 - Engines ...

2002 Ford Ranger. First of all, before I got an oil change, and yes the car had oil in it before. When I would first start the car, engine sounded smooth and okay, but after awhile my engine would make knocking/ticking sounds when first accelerating and then for a second or two after I took the foot off the accelerator.

5 Causes of Engine Ticking Noise in Your Car (When ...

Some engines seem to be noisier with certain oils, my escape is noisier after an oil change and then settles down. If you are really sure it has a rod knock and with 200k on the motor I would put some Rotella T 10w-30 or some other thicker heavy duty oil in it. You say this is the first oil change since buying it,...

Engine noise after oil change? - Bob Is The Oil Guy

Noise after oil change. That is when I check the level and noticed it was below the minimum line, but no oil light ever came on. I checked the bottom of the vehicle for signs of leaks but didn't notice anything. The knocking noise continued and was noticeable when I took the car to be looked at on Tuesday.

Noise after oil change - Car Talk Community

If you hear a clicking noise in your car after an oil change, this could be the result of a few key things. Learn what to do if you hear a clicking noise in your car after an oil change with help ...

A Clicking Noise in a Car After an Oil Change : Car Repair Tips

Loud engine noise after oil change at Costco. You'll hear more valve noise if they forgot to put the cap back on. On most cars these days that would show up immediately with a Check Engine light, but maybe not on an older car. You'll get a little mist of oil out of the open cap if you run the engine, but usually there's a baffle to prevent oil from spraying out directly.

Loud engine noise after oil change at ... - RedFlagDeals.com

This occurred after an oil and filter change and has never happened before. As I finished up adding 4qts of 5w/30 Pennzoil this afternoon and checked the stick afterwards it was where it should be, so I started the car and it was idling fine except that there was a loud tapping noise that sounded like it was in the upper engine area valve or plenum area that was consistent with the engine ...

Noise after oil change Pontiac tapping noise 1993 V6-3.1L

Noise goes away once then engine is warm because the oil becomes thinner and passes through the lifters more easily. It's coincidence it happened after you did your oil change yourself OR your mechanic is using a different weight oil than you think OR he's not actually using Castrol GTX Syn Blend.

Why did my engine start ticking after doing an oil change ...

Answer It is not abnormal for an engine to 'rap' for a few seconds on the first start immediately after an oil change; it takes a moment for the fresh oil to make its way to the valvetrain.

What would cause a knocking sound after changing the oil?

The car engine makes a knocking noise. A knocking noise will sound like a rock tumbler in the deep depths of the engine and it will typically shake the vehicle at idle, and get louder as engine speeds increase. Unfortunately, if you hear a knocking noise, it's usually a sign of major engine damage as a result of serious neglect - a simple oil change probably won't fix the problem.

Signs Your Car Needs an Oil Change | YourMechanic Advice

Whenever loud ticking is involved, the most likely source is the valvetrain, but the reason for that ticking isn't always clear. Most cars use hydraulic valve lifters that rely on oil pressure to maintain a tight clearance between the camshaft and rocker arm. Mechanical issues may also be the cause.

What's That Ticking Sound Coming From Your Car's Engine?

Just got my oil changed at 99,997 miles on my 2003 Saab 9-3 SE. After driving 200 miles, my car started to make this sound does anyone know what this is?

Loud engine noise after oil change

After buying the bike last year, riding, then storing it for the winter, it was time for my first oil change this spring. The previous owner had synthetic in it, and after reading as much as I could on this great site about oil & filters, I changed it using Castrol automotive synthetic 5W-40, and went with a Purolator Pure One PL14610 filter.

Noise after oil change | VFRworld

Not sure if you mean only once after starting the engine after an oil change, but I rode twice and started it two other times on Sunday, rode to work and started it at lunch yesterday, and all seven times I started it after it had been cool, the clicking noise was present.

****SOLVED** Clicking / Tapping Noise After Oil Change**

Knocking noise after changing oil? I changed my oil and oil filter and after cleaning up, which was approximately 30 minutes, I started the truck up and it was knocking. It is a 2000 Ford Explorer 214k miles. This knock wasn't present prior to the oil change. The engine was still warm at the time. I changed the oil. It had been around...
