In 1996 it was followed by the MDEC (MTU Diesel Engine Control). In 2004, there followed the ECU 7 for the Series 2000 and 4000 engines, which is designated ADEC (Advanced Diesel Engine Control). The ECU 8, a special version, followed in 2008 for the Series 1600 engines. Three years later, MTU launched the ECU 9, which also is designated ADEC.

I've been at trainings in MTU Friedrichshafen about all different electronic systems they have manufactured. This system is an old one, later came modern series with modern control and monitoring systems to use with those type of engines. May be you can find some pdf at Internet about MTU, but not a lot of things.

As the brain of the engine, the ECU controls key engine systems that affect the engine's consumption, emissions and performance, such as fuel injection, turbocharging and exhaust gas recirculation. Increasingly stringent emission standards are placing ever greater demands on the electronic engine management system.
