I think you have to turn on the rigid tap option in the settings page. Its been ten years since I used a meldas controller, but I believe it was a 520. It should be a G84 or G84.1 code. these will let you control the tap cycle manually with the pulse generator in single block by switching to manual at the R plane without hitting reset.

Hello all, I am looking for information on parameter settings for axis inhibit. I do not want the protective soft limits around the table or would like to at least be able to adjust them. The Manual I have is for a 520AM control and I have a 520M. The machine is a Ht11/1416 Horizontal machining center with a programable B axis. Thanks, Jay B
