According to some consumer reports, ZD30 engines (particularly newer ones) receive a bad reputation on reliability. The problems that have been experienced are cracks on the cylinder block as thin as a strand of hair and on a piston requiring a rebuild. The other problem is the ECU that doesn't give the engine its maximum performance.

Nissan ZD30 engine | Autopedia | FANDOM powered by Wikia

The cylinders were water damaged and had to be rebored. The problem that I have now is variation of piston heights (crown recession) across the pistons. I have variation of 0.05 mm across the 4 pistons measured as per Nissan tech manual, with 3 being below and 1 above the 0.078 mm spec for gasket thickness selection.
