Mikrotik 2927 Manual - outervalue-lifestyle.com
It is not necessary to add a bridge port as an untagged port, because each bridge port is added as an untagged port dynamically with a VLAN ID that is specified in the PVID property. This is because of a feature that automatically will add an appropriate entry in the bridge VLAN table for convenience and performance reasons, this feature does have some caveats that you must be aware of.

Manual:Bridge VLAN Table - MikroTik Wiki
Warning: In RouterOS it is possible to set any value for bridge priority between 0 and 65535, the IEEE 802.1W standard states that the bridge priority must be in steps of 4096. This can cause incompatibility issues between devices that does not support such values. To avoid compatibility issues, it is recommended to use only these priorities: 0, 4096, 8192, 12288, 16384, 20480, 24576, 28672 ...
